#### Logic Model Workshop

Sheila Bustillos Sam Williamson Shafayat Islam

### What are we doing today?

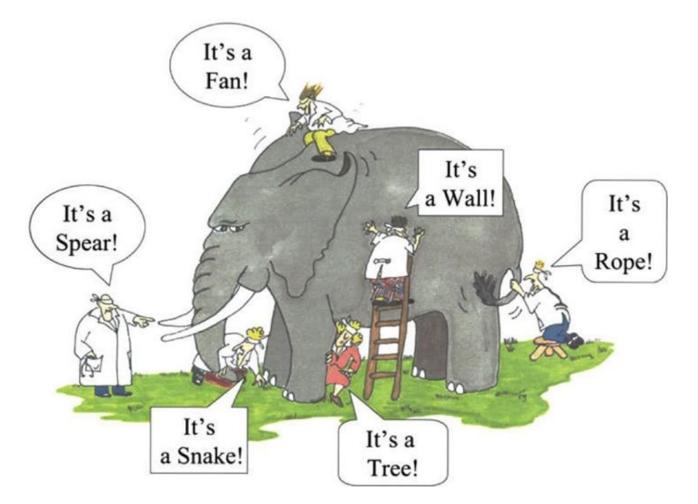

- Why logic models?
- Walk through the logic model process
- Discuss assessment tracking
- Using ecocycles to determine effectiveness

#### See how far the rabbit hole goes!

- Overall Improvement
- Consensus building
- Clarifying meaning
- Funding
- Reporting
- Research
- Communicating Success
- Strategic Planning and Assessment

# Logic Model v. Theory of Change

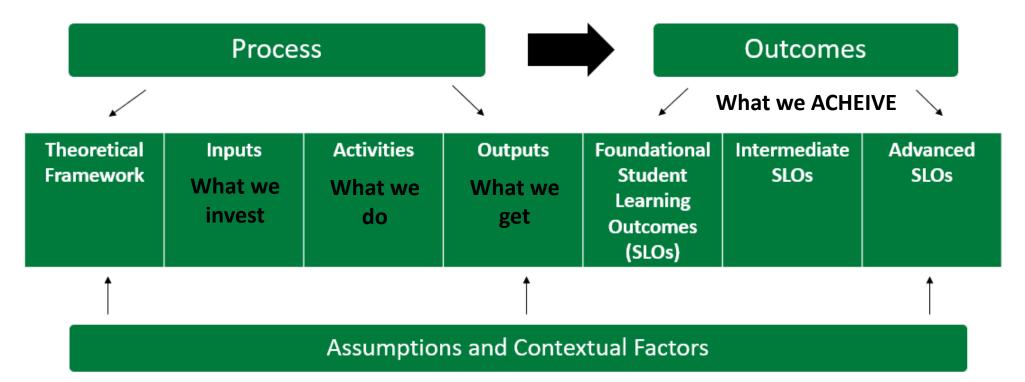

### What's a logic model?

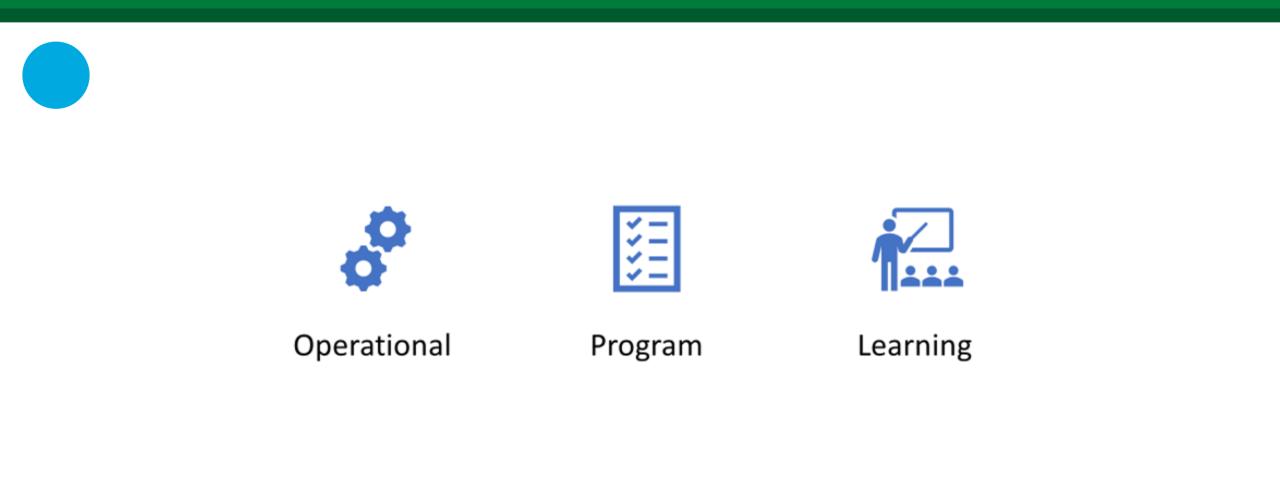

### What's a logic model?

#### There are Three Main Types of Outcomes

## **En**gagement Intensity

**Foundational** - Introductions to concepts without in-depth engagement. They often focus on the student's knowledge and attitudes and beliefs. **Engagement is mostly passive.** 

**Intermediate** – Reinforcing/practicing learned concepts with active engagement to deepen student's knowledge, attitudes, and beliefs. **Engagement is interactive, facilitated learning.** 

**Advanced** – Student's facilitating/teaching other students' foundational or intermediate outcomes and/or creating new projects and demonstrating in-depth knowledge of foundational and intermediate outcomes. Students will demonstrate high levels of self-agency and self-efficacy. **Engagement is lead and/or owned by the individual.** 

#### Wellness Wheel

### What's a logic model?

## **Student Learning Outcomes**

### What are we assessing?

What are the goals of your program?

• Can you measure them?

#### What knowledge/skills do you think your program best provides?

• Why do you think so?

#### What do you know students get from your program?

• How could you prove it?

#### Does your program develop professional/social skills?

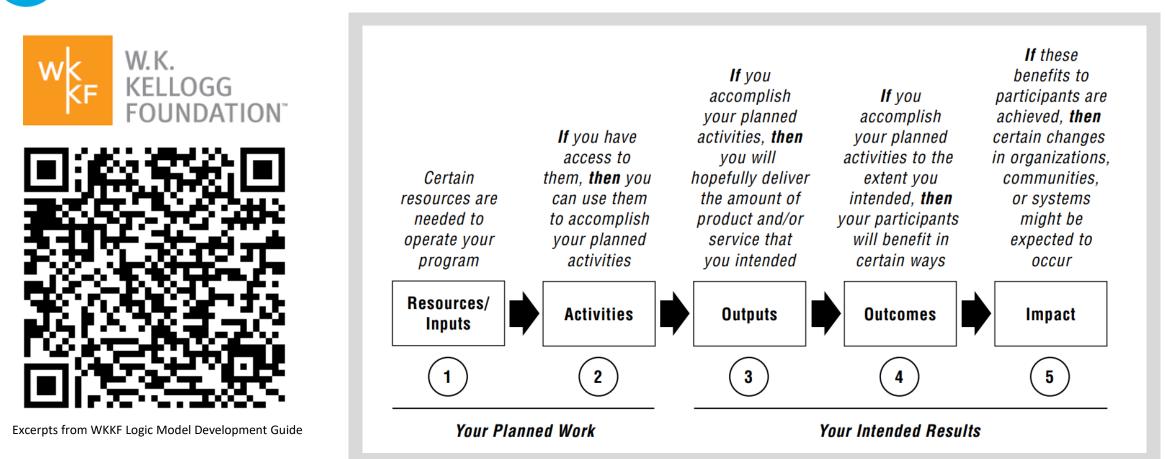

• How do you know?

### **Cr**eating your own logic model

Example

#### **TRIO STUDENT** IMPACT STATEMENT **SUPPORT SERVICES** Motivating students toward postsecondary education success. INPUTS ACTIVITIES OUTPUTS Evidenced-based research Cost per student participant Academic coaching Funding Count and type of services provided Admissions and financial aid Staff Community service GPA tracking Technology applications and software Graduate school exploration Graduation rates UNT collaborations Number of students employed Leadership Number of students entering graduate Mentoring or professional schools Study abroad Program attendance, retention, Tutoring completion and satisfaction Time spent for student interventions OUTCOMES FOUNDATIONAL ADVANCED INTERMEDIATE Enhance leadership and citizenship skills Collaborate with others to achieve Increase communication and decision-making skills common goals Maintain relationships with people who can help one professionally Increased knowledge of how to be Demonstrate dependability present and prepared during programs Make decisions using sound, inclusive Leverage relationships with people who reasoning and judgement Increased self-esteem, validation and can help one professionally perseverance Prioritize and complete tasks to Maximize academic performance Knowledge increase in GPA, graduate accomplish organizational goals Motivate others by encouraging them school and financial wellness Be accountable for individual and team and by building mutual trust Knowledge of the value of higher responsibilities and deliverables Professionally advocate for oneself and education Employ personal strengths, knowledge others Voluntarily participate in further and talents Show a high level of dedication in education or career development Develop career plans and goals completing tasks Build strong, positive personal and Solve problems using sound, inclusive professional working relationships reasoning and judgement \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ WELLNESS WHEEL MARKETABLE SKILLS Emotional Wellness Career and Self-Development **THEORETICAL FRAMEWORK** Environmental Wellness Critical Thinking Tinto's Theory of Early Student Departure; U.S. Communication Sinancial Wellness Department of Education Guidance Occupational Wellness Leadership

Professionalism

Teamwork

Social Wellness

#### WHAT IS A LOGIC MODEL?

A logic model is a planning and evaluation tool that visualizes data and tracks program evaluation plans. Logic models show linear connections between program activities and their intended student learning outcomes.

#### COMPONENTS

Inputs are the resources that go into a program or intervention-what we invest.

Activities are events undertaken by the program or partners to produce desired outcomes—what we do.

Outputs are the direct, tangible results of activities-what we get.

**Outcomes** are the desired results of the program—**what we achieve**. They are categorized as Foundational, Intermediate and Advanced based on the level, intensity and/or skill achievement needed to master the learning outcome.

#### **DIVISION-WIDE THEORETICAL FRAMEWORKS**

Each department within the Division of Student Affairs utilizes the following values and frameworks when teaching and measuring student learning outcomes.

#### NACE CAREER COMPETENCIES/MARKETABLE SKILLS

The National Association of Colleges and Employers created a list of eight marketable skills employers want to see if new employees. The eight career competencies they created are:

Career and Self-Development	Leadership
Critical Thinking	Professionalism
Communication	Teamwork
Diversity and Inclusion	Technology

#### UNT WELLNESS WHEEL

Focusing on the physical, social and mental wellbeing of our university community is a top priority. Now, more than ever, it is important to take time to care for yourselves and each other.

To learn more, scan the QR code or visit **wellness.unt.edu**.

### Assessment Tracking Maps (ATMs)

- Choose at least 1 outcome from the logic model and build an assessment plan with staff
- Use assessment tracking maps to track program success
- Use a project management software, such at Trello or Microsoft Project to track success
- Meet with program staff to go over ATM details

ATMs created using the following sources:

1. Dr. Jane Marie Souza of the University of Rochester

<sup>2.</sup> International Center for Student Success and Institutional Accountability. (2008). Assessment reconsidered : institutional effectiveness for student success (1st ed.). ICSSIA.

#### Assessment Tracking Map (ATM)<sup>1</sup>

GOAL		ΑCTIVITY	Measure	ASSESSMENT	USE OF RESULTS	TIMELINE
Which learning outcome do you want to measure?	How do I plan to do it?		What measure will you use to collect direct assessment data?	How will I know if I am successful? What output and outcome metrics will you track?	What will I do next? Who are my stakeholders?	
Increased education about environment sustainabilit and its importance campus.	tal y on	<ul> <li>Community Garden</li> <li>We Mean Green Fund Committee</li> <li>Campus Race to Zero Waste</li> <li>Natural Dye Garden</li> <li>Bee Campus</li> </ul>	<ul> <li>Pre/posttest surveys</li> <li>Resource Fair Survey</li> <li>1-2 things you learned from this event—Zero Waste,</li> <li>Recall information from curriculum – ask a question about if they knew this information before or if they learned it in the session</li> </ul>	Student Attendance Pre/posttest results Some come in with gardening experience—our programs target those who do not know anything about <u>garden</u> Knowledge increase through program engagement	Other green funds across TX Faculty partners	<ul> <li>Community Garden <ol> <li>Pretest at beginning 23; posttest Beginning of Decand May <li>Recall information for</li> <li>Volunteers</li> <li>We Mean Green Fund</li> <li>Committee</li> <li>Pretest in August for first</li> <li>year and Posttest in March</li> <li>the second year</li> </li></ol> </li> <li>Recall information for volunteers <ol> <li>this event</li> <li>Natural Dye Garden</li> <li>Bee Campus</li> <li>Campus Race to Zero Waste</li> <li>End of the year survey in</li> <li>April for anyone who attend</li> <li>one of these events</li> </ol> </li> </ul>

\*DSA Assessment: Check-ins before and after dissemination; review assessments and provide feedback

<sup>1</sup> This ATM was developed by Dr. Jane Marie Souza of the University of Rochester.

## **Additional Considerations: ATMs**

- What learning strategies will best link the curriculum and its associated student learning objectives to outcomes? That is, how do we translate our educational goals into classroom and experiential learning experiences that will enable students to succeed?
- What are the best data gathering methods for assessing the effectiveness of our learning programs in supporting student learning? How might those methods vary across the spectrum of learning experiences offered on our campus
- What is our programmatic, departmental, divisional, and institutional capacity for change? To what extent does tradition impede change? How does concern about possible change create resistance to assessment? How might that resistance be understood and ameliorated?
- What are the processional skills, competencies, aptitude, and capacities of educators on our campus to fully engage in assessment planning? How can staff and faculty best be linked or partnered to do their best work? What professional development needs exist? How will they be met? What resources exist to support those activities?

International Center for Student Success and Institutional Accountability. (2008). Assessment reconsidered : institutional effectiveness for student success (1st ed.). ICSSIA.

## **Ecocycle Planning**

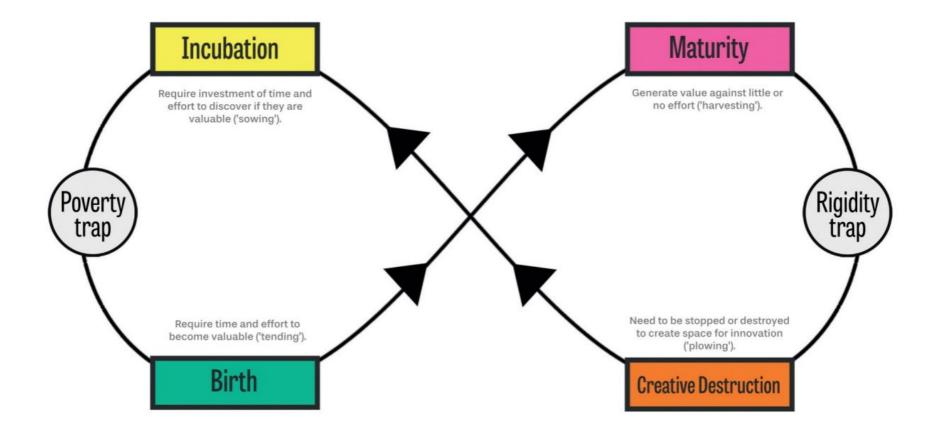

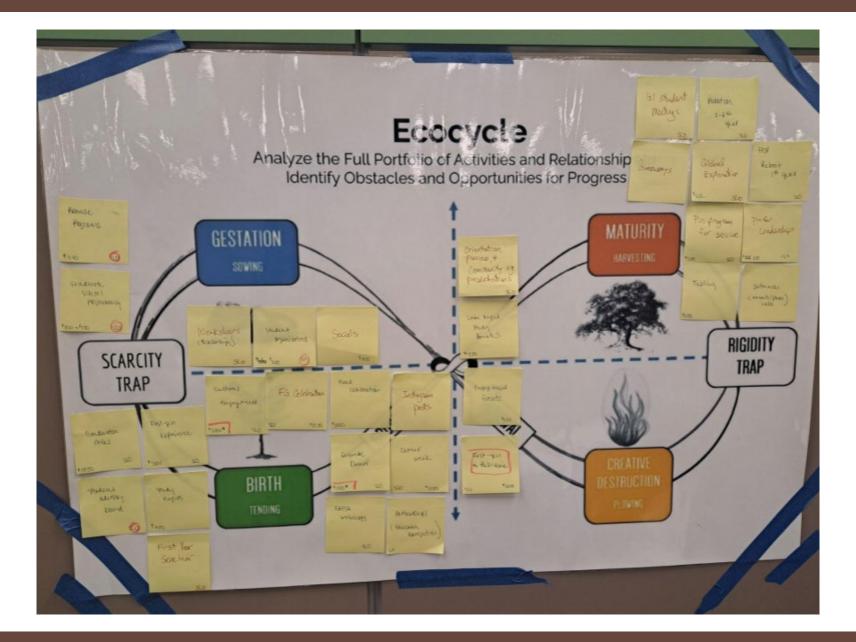

Purpose: looks at the four stages of planning, development, and innovation in program design

- Balance and set priorities
- ROI Return on Inputs
  - a. Time
  - b. Money
- Invites all team members to the table, regardless of rank
- Can be combined with budget analysis and implementation science initiatives
- Helps reveal the whole department picture and see the "forest AND the trees"

#### Ecocycle Planning

## Using Logic Models

#### **Macro Strategic Planning**

- Aggregate data
- Replace, compliment, and/or supplement pre-existing reporting models

#### **Data Visualizations Inward and Outward**

Communication and storytelling

#### Assessment Tracking

- Streamlining effective interventions
- Budget reflection

**Council of Academic Standards (CAS) supplemental/replacement Data Literacy**
